

I am very tired of my goverment telling me who I have to listen to or watch. First it was satellite TV and distant networks. If my local TV is crap I can't watch distant. That is just stupid. If my local Safeway is crap then no one makes me shop there. Now It is going to be Satelllite Radio. My local radio is crap. So crappy that I would rather pay then get it for free. Stay out of it. If my locals want my business then they should get better.
